

# Visit us at the ACHEMA

Frankfurt, June 11 – 15, 2018

Hall 8.0, Stand L81

## INVITATION

**Experience the cutting-edge of sealing technology and movement mechanics.**

Specialty graphites boast huge advantages in sealing technology and in energy-efficient mechanical parts. At the ACHEMA we are presenting best-in-class sealing materials of flexible graphite, oxidation-resistant yarns, and high-strength press-to-size specialty graphites. Products which will help our customers successfully compete on the global stage in the future.

Come and talk to us about implementing future-oriented solutions, in practice and today. Find out, for instance, which sealing materials can handle ever higher process temperatures. Or how to cut costs for maintenance. We will demonstrate the crucial advantages of graphites in reducing energy consumption and environmental impact in many mechanical applications.

You will find us in our usual spot at the ACHEMA – but in a new guise. SGL Group has become SGL Carbon – new brand, new design. We are focused, more than ever, on being a partner to our customers and their needs are at the center of our thoughts and actions. We warmly invite you to come and to talk to us. See the table for who will be on site and when.

**Discover the new SGL.**

We are looking forward to your visit.

Your contact person in Hall 8.0, Stand L81

We look forward to you	MON June 11	TUE June 12	WED June 13	THU June 14	FRI June 15
