

# Visit us at the ACHEMA

Frankfurt, June 11 – 15, 2018

Hall 4.0, Stand F26

## INVITATION

### Experience state-of-the-art process engineering – and more.

Our systems, equipment and components are known for being the ultimate in reliability, efficiency and safety when it comes to chemical engineering, not least because we consistently develop our portfolio. Through strategic partnerships, ever more efficient materials and products, and innovative services, we help our customers to achieve sustainable success in a global market place.

Find out about state-of-the-art process engineering and talk to us about how you can implement future-oriented solutions today. Our digital options for condition monitoring and customer interactions is just one example. Or, find out how complex components can be manufactured from carbon and silicon carbide in a 3D printer.

You will find us in our usual spot at the ACHEMA – but in a new guise. SGL Group has become SGL Carbon – new brand, new design. We are focused, more than ever, on being a partner to our customers and their needs are at the center of our thoughts and actions. We warmly invite you to come and to talk to us. The overview opposite gives details of who will be there and when.

#### Discover the new SGL.

We are looking forward to your visit.

### Your contact person in Hall 4.0, Stand F26

We look forward to you	MON June 11	TUE June 12	WED June 13	THU June 14	FRI June 15
